Attributes: SB - Social Behavior Science, Course Also Offered in Modules

Components: LEC: Lecture

PSY 180 (3 credit hours)

Human Relations

Explores the sociological and psychological forces that affect interpersonal relationships as individuals work and live together. Lecture: 3 credits (45 contact hours).

Pre-requisite: ACT, COMPASS, or ASSET scores for college level reading OR completion of Transitional reading course(s).

Attributes: SB - Social Behavior Science

Components: LEC: Lecture

PSY 185 (3 credit hours)

Human Potential

Introduces the principles of relating to self and others and focuses upon self-growth. Lecture: 3 credits (45 contact hours).

Attributes: SB - Social Behavior Science

Components: LEC: Lecture

PSY 188 (1 credit hours)

Directed Undergraduate Reading in Psychology

Explores in-depth a specific topic related to the student's personal or career interests in psychology under the direction of a faculty member. Reading proposal must be approved by instructor. Lecture: 1.0 credit (15 contact hours).

Pre-requisite: PSY 110 and consent of instructor.

Attributes: Other

Components: LEC: Lecture

PSY 189 (1-2 credit hours)

Directed Undergraduate Research in Psychology

Requires students to design and conduct an elementary research project relevant to the student's personal or career interests in psychology under the direction of a faculty member. Requires development of a psychology literature review. Research proposal must be approved by instructor. 0 credits (30-60 contact hours).

Pre-requisite: PSY 213 and consent of instructor (If PSY 215 is changed to PSY 213 Research Methods) Laboratory: 1.0 - 2.

Attributes: Other

Components: LAB: Laboratory

PSY 212 (4 credit hours)

Applications of Statistics in Psychology

Introduces students to descriptive and inferential statistics in design, analysis, and interpretation of psychological research. Lecture/Lab: 4.0 credits (75 contact hours).

Pre-requisite: ACT, COMPASS, or ASSET score for college level mathematics or completion of Transitional math course(s); PSY 110.

Attributes: Other

Components: LAI: Integrated Laboratory, LEI: Integrated Lecture

PSY 213 (4 credit hours)

Research Methods

Applies scientific methods to psychological research. Provides practical experience in designing and executing a research project using observational, survey, and/or true experimental design methodologies. Requires a written scientific paper on research project results that may involve the application of descriptive and inferential statistics. Integrated Lecture: 3 credits (45 contact hours). Integrated Laboratory: 1 credit (30 contact hours).

Pre-requisite: PSY 110.

Attributes: Other

Components: LAI: Integrated Laboratory, LEI: Integrated Lecture

PSY 223 (3 credit hours)

Lifespan Psychology

Examines physical, cognitive, and socioemotional development throughout the lifespan from conception to death. Reviews concepts, principles, and theories of human development. Explores influences such as heredity, culture, ethnicity, socioeconomic status, and gender across the lifespan. Lecture: 3 credits (45 contact hours).

Pre-requisite: PSY 100 or PSY 110.

Attributes: SB - Social Behavior Science, Course Also Offered in Modules

Components: LEC: Lecture

PSY 230 (3 credit hours)

Psychosocial Aspects of Death and Dying

Examines the biophysiological, psychological, sociological, and cultural aspects of death and dying in the evolving global world. Explores variations in the behaviors and attitudes associated with death, dying, and bereavement, with particular attention to the contexts (e.g., cultural, familial, historical, life span developmental) in which these variations occur. Lecture: 3 credits (45 contact hours).

Pre-requisite: PSY 110 or SOC 101, or consent of instructor.

Attributes: Cultural Competence, SB - Social Behavior Science

Components: LEC: Lecture

PSY 297 (3 credit hours)

Psychology of Aging

Provides an overview of the demographics of aging, theories of aging and research methods used to study adult development. Examines the biological, psychological and social impact of aging, longevity work, retirement, death and bereavement. Lecture: 3 credits (45 contact hours).

Pre-requisite: PSY 110 or consent of instructor.

Attributes: SB - Social Behavior Science

Components: LEC: Lecture

PSY 298 (3 credit hours)

Essentials of Abnormal Psychology

Provides an overview of the theories, diagnoses, and treatments of psychological disorders. Covers the biological, psychological, and social factors that influence the etiology, understanding, and management of psychopathology within society. Lecture: 3 credits (45 contact hours).

Pre-requisite: PSY 110 or Consent of Instructor.

Attributes: SB - Social Behavior Science

Components: LEC: Lecture

PSY 299 (1-3 credit hours)

Special Introductory Topics in Psychology

Introduces specialized topics in the field of psychology to meet current trends and investigations of contemporary issues in the discipline.

May be repeated to a maximum of six credits under different subtitles.

Lecture: 1.0 - 3.0 credits (15 - 45 contact hours).

Pre-requisite: PSY 110 or consent of instructor.

Attributes: Other

Components: LEC: Lecture
