

COMPUTER ENGINEERING TECHNOLOGY

The Computer Engineering Technology program will prepare computer engineering technicians to pursue careers in the design and maintenance of digital systems, network development and testing, and basic database programming and maintenance. Students in this program study networking and computer systems fundamentals, digital circuits design and analysis, programming in multiple computer languages, and database design.

Students enrolled in the Computer Engineering Technology program must achieve a minimum grade of "C" in each technical course.

NOTE: Hours exception (68-72) approved by the KCTCS Board of Regents in March 2021.
