

# GEOSPATIAL TECHNOLOGY

---

The rapidly growing field of Geospatial Technologies (GST) enables users of spatial data the ability to make informed decisions. GST utilizes both time and place as analysis factors. GST is recognized by the U.S. Department of Labor as a high growth, high wage, green industry with a bright outlook. Completers of the certificate will have the skills for employment in GST or associated fields such as Unmanned Aircraft System, agriculture, remote sensing, geospatial intelligence, environmental science, crime analysis, and/or demographics.

## Certificates

- Applications of Geospatial Technology - Certificate (<https://catalog.kctcs.edu/programs-of-study/aas/geospatial-technology/applications-geospatial-technology-certificate/>)
